

One Day Training Course

The Control of Legionella Bacteria in Water Systems

(including Cooling Towers)

Safewater Management Systems hold frequent one day training course on 'The Control of Legionella Bacteria in Water Systems'.

This course has been drawn-up in response to the increasing demands from local Environmental Health Officers for more 'detailed and in-depth training specifically on the requirements of Health & Safety Executives approved code of practice and guidance ACOP L8 2000' on the same subject. The course is aimed at both those persons with the over all responsibility and those who carryout the necessary monitoring regimes for the safe operation of water systems within a building. There is a particular emphasis on Cooling Tower control and monitoring.

Candidates will be restricted to 10 to 15 in number and places awarded 'on a first come, first served basis'.

Next training date; will be held on 18th June 2009

Venue; SWMS Ltd, Unit 19 Glenmore Business Park, Colebrook Way, Andover, Hampshire, SP10 3GL

Cost; is £300.00 + V.A.T per person

For more information and to check availability; please contact SWMS on swms@swmsltd.co.uk.
